PICTURE HANGING SYSTEMS BY FOREST

PHS (*Picture Hanging Systems*) consists of a complete range of safe, flexible and elegant picture hanging systems, including a system with the option for lighting. The systems provide solutions for hotels, museums, art galleries, universities, the public sector and the health care sector. Also for domestic use, PHS provides tailor-made hanging solutions.

The high quality systems are made of aluminium, with a white powder coat finish or silver anodized finish. They come with perlon cord or steel cable provided with the PHS Cobra hook. This unique hook enables an easy fixation on every desired spot. Furthermore, the systems are equipped with the PHS Smartspring or the PHS Zipper. Both these hooks are easy to adjust and self-braking, ensuring a stable fixation to the perlon cord or steel cable.

- Used worldwide in many prestigious museums, art galleries, universities, etc.
- First class materials, produced in Europe
- Rails are powder coated or silver anodized
- Outdoor quality varnish used, so no fading of colours, even after many years
- Fast delivery, worldwide
- Best value for money
- Patented systems

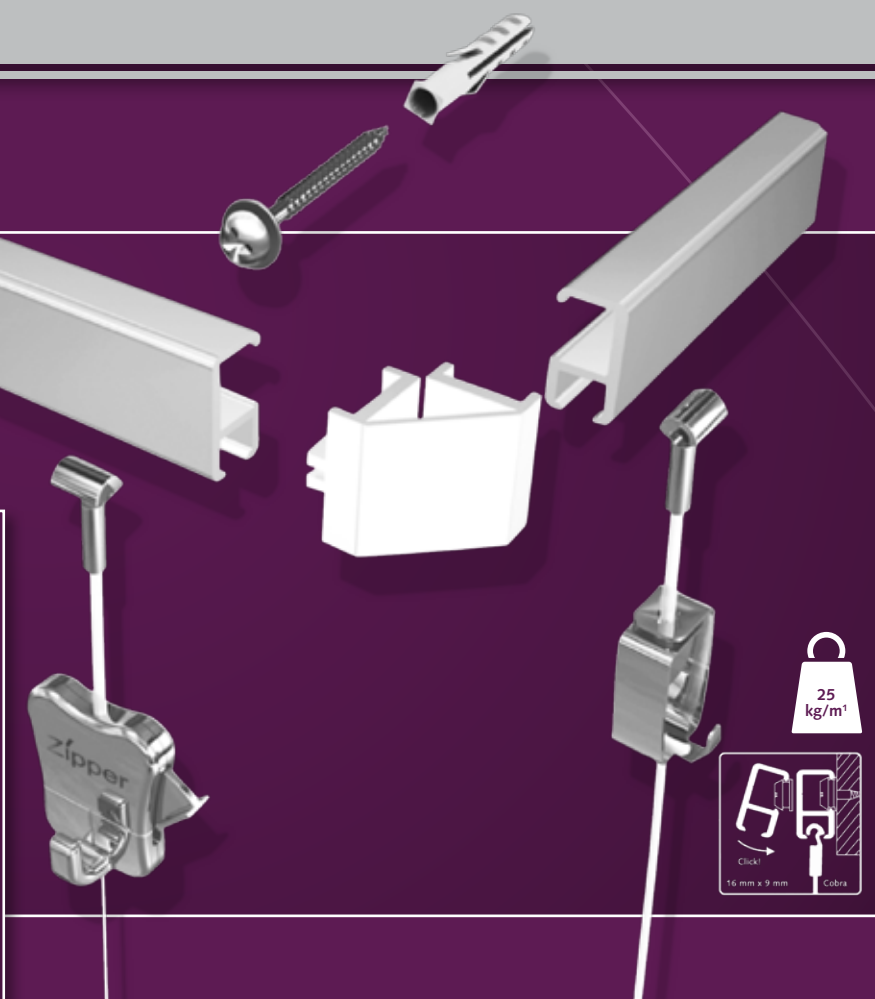

This is the smallest and most innovative picture hanging system in the world. The aluminium part is just 16 mm high and looks very elegant on the wall. Putting up the system is very easy with the specially developed clip screw. Although it is slender, this is still a strong system that can hold up to 25 kg per meter.

Size: 9 x 16 mm

Maximum weight: up to 25 kg per meter

Ceiling Cover

This system fits your needs and fits your ceiling.
The system comes with an extra flange which enables a perfect fit to your ceiling. It is possible to place cables behind this rail (e.g. loudspeaker cables). Ceiling, wall and picture hanging system become one. A hanging system for the perfectionist.

Size: 8.2 x 32 mm

Maximum weight: up to 25 kg per meter
